Meet the 
Chair

Consultation on Future Plans
‘8 Pillars for Success’

Loren Michael Jones
New Future

- Propose to Reform the North West Nuclear Forum
- Introduce the Northern Nuclear Alliance
The NNA Mission is to ensure that the tangible benefits provided by our Alliance are clear to our members and the wider nuclear sector. The Alliance’s approach will be to open doors, overcome obstacles and create opportunities for the Region.
- Commitment to build from the ‘roots up’ putting our members growth at the heart of our entire mission
- Work to align Industry, Government, Education & Institutions in the North West
- New Terms of Reference out for consultation to our members and associates – ‘8 Pillars of Success’
Represent the interests of our members and support them to grow and develop their businesses in both the Civil & Defence Nuclear Sectors.
Ensure the views of our members are heard at regional, national and international levels and act as a collective voice for engagement with various HMG departments, NGO’s and Overseas organisations.
Work with our members to deliver a regional response to various consultation/competitions by government and commercial organisations with the remit to increase the region’s nuclear capability.
Create a platform for strategic issues of our member companies to be discussed, to build awareness, develop solutions and establish strong business relationships between our members.
5. **Support the NIA** in implementing The Nuclear Sector Deal and work with member companies to meet the objectives set to include co-ordination of ‘UK Plc’ teaming for overseas opportunities.
Advise on Regional Supply Chain Development including focus on how SME’s can better engage with Tier 1 & 2 customers and potential investors.

8 PILLARS FOR SUCCESS
Represent our members at major events in the UK and overseas, including a joint NNA Members Exhibition.
8. Provide an industry wide Tender opportunities register which works with its member companies to identify supply chain opportunities.
NORTHERN NUCLEAR ALLIANCE
FUTURE PROJECTS

1st Generation
Energy Production - Coal

5th Generation
Energy Production - Fusion

Project: Submission to UK Research and Innovation, Strength in Places Fund (SIPF) for Nuclear Innovation and Collaboration Hub for the Development of Nuclear Technologies and Processes.
Project: NNA members position in the SMR supply Chain and potential host region for the Urenco U-Battery.
Project: Establishing the NNA membership as key part of EDF/CGN’s Supply Chain for Sizewell C & Bradwell B.
NEXT STEPS

- Consult membership and associates to agree the ToR of the NNA
- Launch Event 16th Sept – Engine Room
- Re-establish the Steering Group
- Submission of EOI for the Innovation & Collaboration Hub
- Consult membership on funding, corporate structure and governance
- Set 2020 Events Schedule
- Define the sub-working groups
THANK YOU FOR YOUR TIME
